Management Philosophy:

To remain a company of customers’ trust and choice

Management Objective:

To build a name-brand boutique house in finance and securities

Action Guidelines:

Gratitude, Sincerity, Courage, Response and Continuity

1. For employees (as to human capital)

(1) Corporate philosophy, corporate strategy and human resource strategy

The Company has made efforts to “Build a company like no others so far in Japan” based on “Ichiyoshi Credo” as a pillar of its corporate philosophy. The Credo records “the Company’s Principles and Action Guidelines which directors, officers and employees all hold as their common measure of value for the Company’s *raison d’être* in the community.

“Ichiyoshi Credo” declares that Ichiyoshi’s *raison d’être* consists in contributing to the advancement of local communities and securities market by serving each individual customer.

For 20-odd years, the Company has determined not to deal in products, such as structured bonds and high-risk and return securities, which are not only difficult for customers to understand but also not beneficial to customers, and formulated its determination as “Ichiyoshi’s 7 Standards” (not dealing in

products simply because they are popular). Simultaneously, the Company has striven to shift from the “Flow Type Business Model” chiefly based on brokerages to customer-focused “Stock Type Business Model” chiefly based on fees on trailer fees and fund-wrap accounts.

From 2019, the Company started its “Decisive Action for Reform” for the first time in 20 years in its reformative action in order to further advance its shift to “Stock Type Business Model.” In addition to “Ichiyoshi 7 Standards” (not dealing in products simply because they are popular), the Company has adopted its another motto as its conviction: namely “We will create a tailor-made product for each customer.” Thus, the Company is proceeding with order-made products matching the needs of each individual customer.

The attainment of the Company’s corporate strategy of “Stock Type Business Model” is identical with the realization of the model of the Company’s *raison d’être* for “Serving each individual customer” = “Customer-first philosophy.” In order to implement this business model and provide customer-focused medium-to long-term advices principally on fund-wrap accounts and investment trusts, advisers are required to familiarize themselves with the needs and life-planning of each individual customer. Thus, the ability of implementing the business model gives rise to the Company’s competitive advantage.

Under the title of “Ichiyoshi Credo,” therefore, the Company puts the item “For employees” in the first place above other items in explaining the Company’s position on each item of “For employees,” “For Customers”, “For Shareholders,” and “For Society”, thereby putting stress on the importance of employees as personnel to build strong relationship of trust with customers with their high professionalism and humanity. Namely, the Company’s “Personnel” is the source of the Company’s *raison d’être*, and the human resource strategy forms the center of the Company’s corporate strategy.

(2) “Recruitment,” “Development” and “Retention” of personnel

In order to implement the shift to customer-focused “Stock Type Business Model,” customers’ trust and the expansion of customers’ assets in custody (which is a barometer of customers’ trust in the Company) are indispensable. In connection therewith, “Recruitment” (reinforcement of personnel sources), “Development” (upgrading of personnel quality) of advisers who closely associate and walk with customers and “Retention” (enhancement of working environment both from the moral and material point of view) being closely intertwined with each other, the boosting of each of them is identical with advance investments for the growth of the Company and the enhancement of the Company’s corporate value.

(i) Recruitment of human resources

In order to maintain a strong relationship with customers and implement medium- to long-term advisory activities, advisers are requested to have deep insight not only on financial and securities matters but also on other related areas and be equipped with high moral ethics, broad-minded personality and high communication capability. In connection therewith, the Company recruits not only new graduates but also mid-career candidates. The Company has also been working on its shift to customer-focused “Stock Type Business Model” from the conventional “Flow Type Business Model” ahead of other securities firms. In connection with the recruitment of mid-career candidates, the Company recruits

candidates from different industries having no experience in securities business more actively rather than candidates experienced in securities business. This recruiting practice is bearing fruits.

In addition, the Company recruits locally-limited employees to build medium-to and long-term relationship with clients in local communities and also recruits back high-skilled employees retired for reasons of wedding, education, nursing care, etc. Such recruitment of retired employees is carried out under the Welcome Back System for Returnees.

Further in addition, the Company is actively proceeding with the recruitment of foreign-nationality personnel from the standpoint of diversity.

(ii) **Human resources development and assessment**

In order to provide advices matching the needs and life plan of each individual investor towards the building of “Stock Type Business Model,” it is essential for advisers to enhance their quality. In connection therewith, the Company are carrying out education and training of employees with foremost stress on their full understanding of “Ichiyoshi Credo.” Thus, all officers and employees always carry the card of “Ichiyoshi Credo” with them so that they share the Company’s raison d’être in the society. Furthermore, in addition to every employee joining the chorus of “Ichiyoshi Credo,” the Company makes time for the Credo Hour for the periodical introduction of advisers’ practical examples based on the Credo so that employees may fully understand the Credo as their common value base.

Additionally, the Company is enhancing its internal training program such as by holding a level-based training program according to tainees’ years of service or job ranking and a training program for officers. With respect to new graduates and mid-career recruits having little or no experience, the Company has in place the utmost attention and care system such as the Instructor System and the Follow-up Training Program. All these programs and systems are provided so that all advisers will be equipped with fundamental knowhow as financial asset advisers.

Furthermore, with respect to new recruits, the Company has in place the OJT (on-the-job training) program under which the GA (growth adviser) System is applied so that new recruits can acquire adviser service in practice.

In order to help employees upgrade their skills, the Company has in place the “Self Growth Program,” which helps employees become a certified member analyst or certified financial planner. In the event of an employee becoming a CMA or CFP, the Company provide him with a monetary award. The Company also has in place the Monetary Subsidy Program such as for correspondence courses to obtain wider

knowledge in addition to qualification as mentioned above.

Furthermore, the Company has the Outside Trainee Program under which certain employees are seconded to an outside company, in the same line of business or different line of business, to accumulate a wide insight and experience and expand his view further, so that he will apply such insight, experience and view of his to the streamlining of, and improvement on, the Company's operations.

With respect to assessment of personnel, the Company has established an assessment method since October 2019 towards the building of "Stock Type Business Model" as follows: The Company lays main stress on "Net increase in customers' assets in custody" without regard to "Commissions earned" among many items of assessment criteria for advisers since customers' assets in custody are a barometer of customers' trust in the Company. In addition, the Company emphasizes the importance of the observance of compliance rules for the sake of customers, and such observance is taken into account in considering an overall and comprehensive assessment of advisers' performance.

2. For Customers (Business Operation on a Customer-first basis)

The Company's motto is to "Be a Securities Company Like No Other So Far in Japan." To realize this motto, the Company makes it a management objective to build a "Name-brand Boutique House" in the finance and securities industry. The Company has proceeded with business operations on a "Customer First Basis" since its founding. Following the Japanese Big Bang in late 1990s, there started the movement of "From Savings to Investments." To promote this movement further, the Company has been making efforts to transform itself to "Stock-Type Business Model" (asset-accumulation type business model), thereby providing customers with high-quality products and better services, all for customers' asset building.

[Triangular Pyramid Management]

Under this triangular pyramid management, 4 divisions ("Customer services," "Products and Management," "Research" and "Backup") form their respective facets of the pyramid and support one another, thereby maximizing functions of each division/ subsidiary. Co-working between and among divisions and subsidiaries will further enhance synergistic process. The synergistic process will help provide better products, more useful information and better services, thereby contributing to customers' asset and business management.

3. For Shareholders (Action to Implement Management that is Conscious of Cost of Capital and Stock Price)

In order to meet expectations of all stakeholders, including shareholders, of Ichiyoshi Securities Co. Ltd. (the "Company"), the Company has worked on business management by maintaining a full awareness not only of the level of revenue and profit on the profit & loss statement but also of the cost of capital and return on capital on the balance sheet so that it will lead to an increase in corporate value on a medium- to long-term basis and realize a sustainable growth.

PBR (price book-value ratio) is one of corporate-value barometers based on the balance

sheet and a product of ROE (return on equity) and PER (price earnings ratio), and the Company regards the raising of ROE as most important for the improvement of PBR.

Specifically, the Company will aim to complete its management target of customer-focused “Stock-Type Business Model,” and make efforts to expand customers’ assets in custody chiefly based on investment trust funds and wrap-account assets, both the sources of stable revenue, so that it will achieve return on capital surpassing the cost of capital and sustainable growth.

Since an increase in customers’ assets in custody and a rise in revenue are proved to have a proportional relationship with each other, the Company believes that the increase in customers’ assets in custody itself will lead to the rise in revenue, resulting in the raising of PBR.

Therefore, the Company regards the cost coverage ratio (the ratio at which the sum of trailer fees and wrap-account fees covers the selling, general and administrative expenses) as an index to measure the progress in “Customers’ Assets in Custody” and the shift to “Stock Type Business Model,” and has adopted the cost coverage ratio as the most important management target. The cost coverage ratio is also included in the current Medium-Term Management Plan together with “Customers’ Assets in Custody” and “ROE” as targets.

[New Medium-Term Management Plan “Target 5 <ONE TEAM>”]

Starting from April 1, 2026, the Company started its New Medium-Term Management Plan to further accelerate its shift to “Stock Type Business Model,” targeting the 4-year plan’s completion date at the end of March 31, 2030.

Numerical targets under “Target 5 <ONE TEAM>”

Item	Numerical targets at end of March 2030
Customers’ assets in custody	5 trillion yen
Ratio of base assets (Dre Colle) and Semi-core assets (Ichiban boshi & Mizunara) out of total customers’ assets in custody	30%
Cost coverage ratio*	100%
ROE	15%

*The ratio at which the sum of trailer fees and fund wrap accounts covers selling, general and administrative expenses.

[Policy on Earnings Distribution and Payment Record of Dividends]

(1) Policy on dividends payable out of retained earnings

One of the Company’s core management policies is to make an appropriate earnings distribution to its shareholders. The Company places its stress on a continuous stream of dividend payment linked to business result. In deciding on an amount of dividend payment, payout ratio is a basic measure. Additionally, DOE (namely, ratio of dividends to shareholders’ equity) is taken into account for a continuous stream of dividend payment.

Specifically, the Company has adopted the payout ratio of approximately 50% and the DOE of approximately 2%, the both measures being calculated semiannually on a consolidated basis and the larger result of the calculation between the two measures being chosen.

(2) Record of dividend payment out of retained earnings

The Company pays interim dividends and final dividends on the consolidated basis under the above-mentioned policy.

In addition for the fiscal year ended March 31, 2026, the Company decided to pay commemorative dividends to commemorate its 75th anniversary of founding and express its gratitude to shareholders for their continuous support as follows:

10yen payable to shareholders of record as of September 30, 2025 and also payable to shareholders of record as of March 31, 2026, thus annually totaling 20yen.

As a result, the total amount of interim dividend per share amounted to 30yen (of which 10yen is the commemorative dividend) and total amount of final dividend per share amounted to 59yen (of which 10yen is the commemorative dividend), together annually totaling 89yen.

4. For Society (regarding Climate Change)

(1) How the Climate Change will risk and affect the Company's Business Activities and Earnings

In order to effect appropriate asset valuation and proper asset allocation in the management of customers' accounts on a medium- to long-term basis, the Company needs a consistent and appropriate disclosure of information regarding climate change-related risks to investment target companies and their earnings. The lack of such disclosure would cause troubles to the management of customers' financial assets, such as the loss of stability of customers' asset management and the lowering of medium- to long-term investment performance. If that should happen, customers' trading opportunities with the Company might decrease, resulting in the lowering of the Company's earnings.

Conversely, if investment target companies make consistent and appropriate disclosure of information, it will contribute to the stability of the Company's customers' asset management and to the raising of medium- to long-term performance of their investments. Such condition may help the Company increase its earnings.

Hence, Ichiyoshi Research Institute (IRI), which has long specialized in research on small- and medium-cap companies, has now adopted ESG achievement (including the handling of climate change) as one of its important criteria for the selection of research target companies. The result of IRI's research is applied to the management of the Company's customers' assets.

Ichiyoshi Asset Management (IAM), a subsidiary of the Company, also applies IRI's research result on ESG to its management of investment trust funds.

Furthermore, IAM manages an investment trust fund "Ichiyoshi ESGs Small- and Medium-Cap Equity Fund."

Thus, the Company believes that the asset balance of IAM's publicly-offered investment trust funds are one of useful indicators of how climate change and its risk have affected the Company's business activities and earnings.

(2) Policy toward climate change based on TCFD'S Recommendation

Based on the Company's "Basic Policy on Sustainability," the Company has specified challenges to be tackled as important tasks (materiality). One of such tasks is "Reinforcement of Tackling for Reduction of CO2 Emission" for "For Society," showing the Company's determination to contribute to the society as one of its members.

Realizing the importance of the disclosure of climate-related information, the Company is proceeding with the expansion of contents of the disclosure as the Company agrees

with Task Force on Climate-Related Financial Disclosures (an international organization).

(i) Governance

The Company has in place “Sustainability Promotion Meeting” under the supervision of the Board of Directors to plan, enforce, inspect and improve the method of promoting sustainability. The Meeting is chaired by President and Executive Officer and makes periodical reports to the Board of Directors. “Sustainability Promotion Room,” a secretariat to the Meeting, is a center for the Company’s sustainability activities.

(ii) Strategy

The Company presumes that there are risks and opportunities relating to climate change. Regarding risks, the Company presumes that there are risks from transfer to lower-carbon economy and risks from physical changes caused by climate change. Regarding opportunities, the Company presumes that there are opportunities relating to “products/services” and “market.” Based on such presumption, the Company has studied potential situations and effects. As a result of such study so far, the Company now recognizes that potential risks are not so material as to affect the Company’s business seriously. Naturally, the Company will continue such study with an eye on changes in circumstances.

(iii) Risk management

Climate change-related risks are presumed to be widely and intricately linked to risks financial instruments firm face in their business activities. Thus, the Company treats climate change-related risks as major ones to be handled at “Risk Management Meeting.” The contents of risks will be reported to “Internal Control Committee” which will deliberate the contents and report the result to the Board of Directors.

(iv) Index and targets

Environmental Agency and Ministry of Economy, Trade and Industry formulated a guideline to ensure consistency with GHG Protocol (international standard) relating to green house gas emissions (GHG) from supply chains. Towards the realization of carbon-free society, the Company aims to attain zero emission of GHG (Scope 1, 2) on a net basis by 2050. Based on the Company’s computation, the Company assesses climate change-related risks and opportunities, at the same time measuring its advance in handling the matter.

< GHG Emissions: Unit: t-CO₂ >

<Management System and Corporate Governance>

The Company moved from the statutory auditor system to the company-with three-committees system effective from June 2003. Hence, the Company has been equipped with a corporate governance system in which management decision-making, supervisory control and business execution each functions independently and effectively. Namely, decision-making and supervisory control are performed by the Board of Directors and each of the three committees, and business execution is carried out by executive officers with the assistance of operating officers. [The diagram of Governance System is omitted in this English version]

(1)Decision-making and Supervisory control

(i) Board of Directors

The Board of Directors resolves on matters required legally and stipulated under the Articles of Incorporation, decides or approves basic management policies and material matters on business executions and supervise business executions by directors and executive officers.

(ii) Nominating Committee

The Nominating Committee deliberates and decides on the nominees for directors to be elected or dismissed at the shareholders' meeting.

(iii) Remuneration Committee

The Remuneration Committee reviews and decides on the individual remuneration of each director and executive officer, and operating officer.

(iv) Audit Committee

The Audit Committee audits the performance of duties by the directors and executive officers, prepares an audit report and a draft resolution to appoint or dismiss accountants to be submitted to the shareholders' meeting for approval. The Audit Committee audits the legality and appropriateness of decision-making by directors and executive officers and the status of development of the Internal Control System in accordance with the auditing policy and the role-division set by the Audit Committee. The Company has in place the Audit Committee Office as a body to assist the Audit Committee. The Audit Committee Office is staffed with full-time personnel.

(v) Management Committee

The Management Committee is an advisory body to the Board of Directors and, as such, reviews important and/or urgent matters for the smooth management of business and reports the result of such reviews to the Board of Directors. .

(vi) Internal Control Committee

Aiming to build the unified internal control system for the Company and its subsidiaries, the Internal Control Committee formulates the internal control policy and reviews each individual important matter concerning internal control.

(vii)Meeting of Directors without Executive Power

The meeting consists of Chairman of Board of Directors and five outside directors to widely exchange information on the Ichiyoshi group, the securities industry and the economical environment.

(viii)Meeting of Independent and Outside Directors

Independent and outside directors actively contribute to discussions at meetings of

the Board of Directors by exchanging and sharing their views and insights from independent standpoints, thereby enhancing the effectiveness of the Board of Directors.

(ix) Committee of Outside Experts

The Committee of Outside Experts consists of members who have outstanding personality and insight and are independent of the Company. The Committee of Outside Experts deliberates on important management matters, as requested by the Board of Directors, independently, fairly and from the neutral standpoint, and provides the Board of Directors with their advice and recommendation based on such deliberation.

(2) Business execution

(i) Executive Officers

Executive Officers can make decisions on the execution of matters entrusted by the Board of Directors, contributing to the smooth decision-making and business executions.

(ii) Committee of Executive Officers

The Committee of Executive Officers resolves on matters entrusted by the Board of Directors and coordinates activities among them for their smooth executions.

(iii) Operating officers

Following the decision made by the Committee of Executive Officers, each Operating Officer performs business execution under the instruction of his supervising Executive Officer.

(iv) Other meetings

The Company has in place the “Sustainability Promotion Meeting” which plans, executes, examines and improves on the Company’s handling of sustainability. The meeting is a sub-group for the “Risk Management Meeting” (to consult on and cope with company-wide risk management), the “Unified Compliance Meeting” (to advise and follow up on review items at individual compliance meetings)) and the , “Individual Compliance Meeting” (to seek out risk items at individual sections for understanding and review), all of them acting as sub-bodies to the “Internal Control Committee.”.

In addition, the Company has in place the “Information Disclosure Meeting” (to make proper, comprehensive and timely disclosure of any material event as it ever happens) and the “IT Meeting” (to review matters on IT investment and management and information security), both as decision-making organs of the Committee of Executive Officers.

(3) Measures to Ensure the Effectiveness of Board of Directors

Since before the installation of the corporate governance code, the Company has had in place the company-with-three-committees system separating decision-making and execution with outside directors consulting fully with executing officers. Currently, as before, free and open discussions are being made at meetings of the Board of Directors, with executing officers listening to comments by outside directors. When there arise matters requiring more data in the eyes of outside directors, such matters will be treated as items of continued deliberation, thereby ensuring transparency.

In order to further ensure the effectiveness of the Board of Directors, the following measures are being taken:

(1) Meeting of non-executive directors and meeting of outside and independent directors

The meeting of directors without executive power is held with the Chairman of the Board of Directors acting as chairman for the purpose of supervising the Company’s management from the independent and objective points of view. In addition, the meeting consisting of independent and outside directors only chaired by the Head Outside Director is held at any time to share and promote objective exchanges of

views and opinions on the Company's management.

At the meeting, exchanges of views on securities industry, economy, social matters, beside the management of the Company are made freely and openly, thereby ensuring the effectiveness of the Board of Directors. Such meetings were held 15 times for the fiscal year ended March 31, 2026 to promote the practicability of Board decisions. In the fiscal year ended March 31, 2026, among major topics at the meeting were trends of interest rate difference between the U.S. and Japan and Japanese political climate. Discussion also touched on customers' assets in custody, cost coverage, utilization of personnel resources and social contribution activities.

The meetings of independent and outside directors were held twice for the fiscal year ended March 31, 2026 for the purpose of exchanging and sharing views widely on the Company's business as a whole.

(2) Outline of questionnaire result on effectiveness of Board of Directors

Since 2017, questionnaire to all directors has been conducted for the purpose of surveying the performance and effectiveness of the Board of Directors. 33 items in the questionnaire are intended to test whether the Board of Directors is properly functioning. The results are used to improve on problem areas and strengthen the Company's advantages, thereby continuously ensuring the effectiveness of the Board of Directors.

<Basic Policy and Operational System to Promote Sustainability>

In addition to promoting Corporate Philosophy further, the Company has in place "Basic Policy for Sustainability" to contribute to realizing a sustainable society.

Basic Policy for Sustainability

The Company will deal with various tasks relating to circumstances, society and community under "Ichiyoshi Credo," thereby contributing to the development of, and improvement on, circumstances, society and community. Through such contribution, the Company seeks to grow continuously in the finance and securities industry, at the same time building a more solid business model and raising its corporate value.

Report on Business Result

(For the fiscal year from April 1 2025 to March 31, 2026)

I Information on Current Status

1. Business Condition and Performance

During the fiscal year ended March 31, 2026, the Japanese economy continued its gradual recovery pattern amid some fears on the effect of worsening Middle East situation. Personal consumption showed signs of revival despite rising prices on the back of income improvements. Corporate production activities generally, excluding some sectors affected by U.S. tariffs, remained on their recovery track. Equipment investments such as for AI-related activities and construction maintained their steady growth. Globally, while there were fluctuations as among areas, overall economic activities recorded a gradual growth pattern under weakening inflationary pressure.

The Japanese stock market recorded a substantial rise in fiscal 2025. Thus, the Nikkei Stock Average (the Nikkei Average) on the Tokyo Stock Exchange (the TSE) approached the 60,000 yen mark in the latter half of February 2026. In April, 2025, the Nikkei Average fell below 31,000 yen mark temporarily under the shock of U.S. tariffs. As the sense of security was enhanced by the Japan-U.S. agreement on tariffs in the latter half of July, the Nikkei Average went over the 50,000 yen level for the first time in October. Thereafter, in anticipation of positive fiscal policy by the new government under Prime Minister Takaichi, the Nikkei Average rose to 52,636 yen on November 4. Thereafter, however, the market weakened somewhat amid the feeling of overpricing for AI- and semiconductor-related stocks. As the year turned, expectations for expansive fiscal policy and growth investments rose, buying trades from overseas sources arising from the end of the general election swelled, pushing up the Nikkei Average to 59,332 yen in the intra-day trading on February 26. As March came, the Middle East situation worsened, pushing up oil prices and causing downward trends in global stock markets. Thus, the Nikkei Average ended the fiscal year at 51,063 yen.

In the foreign currency market, the yen rate against the U.S. dollar was on the 149 yen per 1 U.S. dollar level at the beginning of the period. Although the yen rose to the upper 139 yen level on April 22, after summer, the yen weakened further. As the year turned, the yen recorded 159 yen per 1 U.S. dollar in the middle of January, causing anxiety over foreign currency market intervention. As a result, the yen strengthened to 152 yen per 1 U.S. dollar at one point. As dollar buying increased against the background of worsening Middle East situation, the yen closed the fiscal year at the 158 yen per 1 U.S. dollar range.

In the Growth Section of the TSE for companies with high growth potential, the TSE Growth Section Index started the period at 820. The index plummeted to 686 on April 7 and then rebounded 1,037 on August 19. Without maintaining its high level, the Index ended the period at 911. TSE Growth Section 250 Index started off the period at 636. It fell to 534 on April 7 and recovered to 800 on August 19. After going through corrections and rebounds thereafter, the Index ended the fiscal year at 699.

In the Prime Section of the TSE, the average daily turnover was 6,701.5 billion yen. In the Standard Section of the TSE, the average daily turnover was 209.0 billion yen. In the Growth Section of the TSE, the average daily turnover was 191.0 billion yen.

Under these circumstances, the Company aimed to build customer-focused “Stock-Type Business Model,” and exerted its efforts to double core-stock assets in fund-wrap accounts and investment trust funds in order to expand its customers’ assets in custody to 3 trillion yen as a numerical target under the Medium-Term Management Plan “3・D.”

As the Company ended its “3・D” management plan on March 31, 2026, it started New Medium-Term Management Plan “Target 5 <ONE TEAM> to further accelerate its shift to “Stock Type Business Model.”

The cost coverage ratio, which is the best indicator for the Company’s shift to “Stock Type Business Model,” for the fiscal year ended March 31, 2026, was 84.3%, up from 71.4% for the preceding fiscal year.

(The cost coverage ratio is the ratio at which the sum of trailer fees and wrap-account fees cover selling, general and administrative expenses.)

Also, fees on stable-income sources accounted for 64.7% of total fees and commissions received, up from 64.1%.

With regard to “Dream Collection” (nicknamed as “Dre Colle”), a fund-wrap account vehicle and a core of “Stock Type Business Model,” with its 10-year history behind, it enjoys an increasing popularity among customers as a medium- to long-term investment vehicle for customers’ conservative assets. Its outstanding balance as of March 31, 2026, amounted to 440.2 billion yen, up 34.5%.

The Company started new services from 2024: namely, “Dre-Colle NISA” (which can be used as a growth investment frame for NISA investments) and “Dre-Colle Mini” (which is an automatic monthly subscription type). By combining “Dre-Colle Pass” (which makes the succession of the fund to next generations possible without cashing in the fund) with the new two services, the Company can support its clients’ asset-formation for a medium- to long term across generations.

With respect to investment trust funds (other than Dream Collection), the Company has recommended stock funds matching customers’ needs, such as “Ichiyoshi Global Equity Fund” (nicknamed as “Ichiban Boshi”), “Ichiyoshi Japan High Yield Stock & J REIT Fund” (nicknamed as “Ashitaba”) and “BlackRock World High Yield Stock Open.”

The outstanding balances of these funds as of March 31, 2026, amounted to 864.6 billion yen, up 13.4%

With respect to Ichiyoshi Asset Management Co., Ltd. the assets under its management continued to increase and amounted to recorded 744.3 billion yen as of March 31, 2026, up 27.8%.

With respect to activities on stocks, the Company has proposed to customers asset-backed stocks with stress on stability and stable dividends under low-interest rate and inflationary circumstances. In addition, the Company has recommended to customers investment in small- and medium-cap growth stocks selected based on the Company’s strength in research. The Company has thus continued to make

various proposals and recommendations to promote stocks as means of medium-to long-term asset-formation.

Under such environment and activities, net operating revenue for fiscal 2025 amounted to 24,508million yen, up 30.6% from fiscal 2024. Selling, general and administrative expenses amounted to 18,347million yen, up 11.4%. Hence, operating profit registered 6,159 million yen, up 169.5%.

Customers' assets in custody as of March 31, 2026, amounted to 2,647.5 billion yen, up 20.1%.

2. Commissions and Selling, General and Administrative Expenses

(1) Commissions

Total commissions for the fiscal year ended March 31, 2026 amounted to 23,902 million yen, up 30.3% from the previous fiscal year.

(i) Brokerage commissions

8. Challenges to Be Tackled

As the flow of capital from “Savings to investments” has got into full swing for the past several years amid concerns over inflationary economy, the spread of New NISA and the positive fiscal policy being carried out by Prime Minister Takaichi against the background of 100 year life, the Japanese finance and securities industry is strongly required to conduct customer-focused business operations.

For the 20 years or so, the Company has maintained the “Ichiyoshi Standards” containing 7 principles, which prohibit the Company from dealing in products incomprehensible or not advantageous to customers such as structured bonds containing risk-return packages and advise the Company’s employees not to sell products simply because they are popular among people. In the same spirit, the Company has sought to transform itself from “Flow-Type Business Model” chiefly based on brokerage commissions to “Stock-Type Business Model” chiefly based on retainer fees on investment trust funds and wrap-account fees. Since 2019, the Company has been proceeding with its “Decisive Action for Reform” in its first reformative action in 20 years to cope with changes in circumstances and to more focus on customer-based business. Decisive Action for Reform is intended to further expand customers’ assets in custody as a barometer of management and further solidify its transformation to “Stock-Type Business Model. In addition to “Not selling products simply because they are popular,” the Company has put up another guideline of “Producing of products suited for each customer’s needs.”

In the course of carrying out “Decisive Action for Reform,” the Company has streamlined its management and staff, including the replacement of president and rejuvenation of management staff. In addition, the Company discontinued its underwriting division which had been underperforming and losing its relative weight in the Company. The Company has also abolished its regional advisers system and changed its sales promotion system from traditional headquarters-based system to branch-led system, thereby each branch providing locally-based goods and services to each customer. Efforts to make various reforms to provide each customer-focused services are continuing.

Further from the point of view to serve customers better, the Company is in process of reorganizing its branch network system, such as changing branches to a smaller scale of planet plazas closer to customers.

Under the New Medium-Term Management Plan “Target 5 <ONE TEAM>” which started April 1, 2026, the Company is challenging the task of achieving customers’ assets in custody of 5 trillion yen by March 31, 2030 as the step toward the next growth stage. In order to promote further growth, the Company intends to make upfront investments for personnel, AI and DX, thereby strengthening recruiting, development and retention of personnel and promoting productivity. In order to attain a “Boutique House in Finance and Securities Industry” as a management target, the Company intends to continue “Decisive Action for Reform,” and make most of Ichiyoshi’s group strength (consisting of advisability of Ichiyoshi Securities, research capability of Ichiyoshi Research Institute and asset management capability of Ichiyoshi Asset Management) compliance capability (leading to customer satisfaction) to realize a sustainable growth with the expansion of customers’ assets as a main focus.

VII. The System and Policy of the Company

1. Basic Policy on Control of the Company

(1) Contents of basic policy

The Company has adopted a management policy of “To remain a firm of customers’ trust and choice” and strives to become a “Name-brand boutique house in the finance and securities industry” under its motto of “To build a securities firm like no other in Japan.” The basic policy of the Company is to provide services based on a “Good Long Term Good Relation” with each of the Company’s customers, and by strengthening this policy, the Company believes that it is able to enhance its corporate value and, in turn, the common interests of its shareholders on a medium-to long-term basis.

Hence, the Company believes that the persons who control decisions on the Company’s financial and business policies need to be persons who understand the Company’s management philosophy and who will make it possible to ensure and enhance the Company’s corporate value and the common interests of its shareholders.

Therefore, the Company believes that persons who would make a large-scale acquisition of the shares of the Company in a manner that does not contribute to the corporate value of the Company or the common interests of its shareholders would be inappropriate to become persons who control decisions on the Company's financial and business policies. The Company believes that it is necessary to ensure the corporate value of the Company and, in turn, the common interests of its shareholders by taking the necessary and reasonable countermeasures against such large-scale acquisitions.

(2) Measures to materialize the basic policy

<1> Effective utilization of Company's assets, appropriate form of corporate group and other special measures to realize the basic policy

a. Measures to enhance the corporate value through a medium-term management plan.

In order to further widely solidify its business base so far built to become a "Name-Brand Boutique House in the Finance and Securities Industry, the Company formulated a new "Medium-Term Management Plan" ("TARGET 5 <ONE TEAM>") with its target date set at the end of March 31, 2030. Under the plan, the Company intends to expand its customers' assets in custody to 5 trillion yen for the four-year period by the end of March 31, 2030.

b. Corporate governance and policy on return to shareholders.

The Company consistently aims for mobility and transparency in management decision-making, rapid business execution and tightened control on execution of duty, and considers corporate governance as one of its priority issues in management.

As early as in 2003, the Company adopted a committees-based-company system. The Company's Board of Directors, which comprises 7 directors including 4 outside directors, makes management decisions and supervises the execution of duties by executive officers. The Audit Committee, which consists of 3 outside directors, supervises the execution of duties by directors and executive officers. The Company has in place the Internal Audit Department as a centralized control unit, which strives for improvement on internal governance.

The Company take a proactive stance with respect to shareholder return. As reported in **2 Policy on Decision on Dividends Paid out of Retained Earnings** on this and next page, the Company decides on an amount of dividend per share semi-annually.

<2> Measures to prevent decisions on the Company's financial and business policies from being controlled by persons deemed inappropriate under the basic policy.

When a party attempts a large-scale acquisition of the Company's shares, it will strive to collect and disclose information required to help shareholders understand such attempt properly, and take proper measure the Board of Directors are authorized to take under the Company Law, other applicable laws and the Articles of Incorporation of the Company.

(3) Judgment by Board of Directors and reason therefor as to concrete measures.

Measures mentioned in <1> and <2> of (2) above follow the basic policy on the control of the Company and conform to the corporate value of the Company and the common interests of its shareholders and do not aim to maintain the status of the members of the Board of Directors.

2. Policy on Decision on Dividends Paid out of Retained Earnings

The Company places its stress on a continuous stream of dividend payment linked to business result. In deciding on an amount of dividend payment, payout ratio is a basic measure. Additionally, DOE (namely, ratio of dividends to shareholders' equity) is taken into account for a continuous stream of dividend payment.

Specifically, the Company has adopted the payout ratio of approximately 50% and the DOE of approximately 2%, the both measures being calculated semiannually on a consolidated basis and the larger result of the calculation between the two measures being chosen.

Under the dividend policy mentioned above, an interim dividend per share paid out of the Company's retained earnings to shareholders of record as of September 30, 2025 was 30yen (of which 10yen was a commemorative dividend), and a final dividend per share payable to shareholders of record as of March 31, 2026 is to be 59 (of which 10yen is to be a commemorative dividend)), thus an annual total of dividend per share being 89yen.
